Volume Contents

Volume 10 Number 1

G. CERAMI	1	Symmetry breaking for a class of semilinear elliptic problems
L. TURYN	15	Travelling waves for forced Fisher's equation
Y. EBIHARA, L. A. MEDEIROS and M. MILLA MIRANDA	27	Local solutions for a nonlinear degenerate hyperbolic equation
E. W. C. VAN GROESEN	41	On small period, large amplitude normal modes of natural Hamiltonian systems
H. BREZIS and L. OSWALD	55	Remarks on sublinear elliptic equations
H. BEGEHR and R. P. GILBERT	65	Hele–Shaw type flows in $\mathbb{R}^n$
K. A. GRASSE	87	A higher-order sufficient condition for local surjectivity
P. ZEZZA	97	Admissibility, dichotomies and nonlinear ordinary differential equations
ZHENG SONGMU	107	Remarks on global existence for nonlinear parabolic equations
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 2

P. TOLKSDORF	115	Remarks on quasi(sub)minima
K. KUNISCH and L. WHITE	121	Parameter estimation for elliptic equations in multidimensional domains with point and flux observations
S. AHMAD	147	Nonselfadjoint resonance problems with unbounded perturbations
B. RUF and P. N. SRIKANTH	157	Multiplicity results for ODE's with nonlinearities crossing all but a finite number of eigenvalues
J. BEBERNES, D. EBERLY and W. FULKS	165	Solution profiles for some simple combustion models
P. BRUNOVSKÝ and B. FIEDLER	179	Numbers of zeros on invariant manifolds in reaction–diffusion equations
A. L. EDELSON and J. D. SCHUUR	195	Increasing solutions of $(r(t)x^{(n)})^{(n)} = xf(t, x)$
J. R. WARD, JR	207	A boundary value problem with a periodic nonlinearity
SOFTWARE SURVEY SECTION	I	MATHLIB
	II	BDLAYER

Volume 10 Number 3

G. B. PASSTY	215	The parallel sum of nonlinear monotone operators
N. HIRANO, K. KIDO and W. TAKAHASHI	229	Asymptotic behavior of commutative semigroups of nonexpansive mappings in Banach spaces
C. M. ELLIOTT and A. FRIEDMAN	251	The contact set of a rigid body partially supported by a membrane
C. MADERNA, C. D. PAGANI and S. SALSA	277	Existence results in an inverse problem of potential theory
M. NAKAO	299	Global solutions for some nonlinear parabolic equations with nonmonotonic perturbations
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 4

T. IWAMIYA, S. OHARU and T. TAKAHASHI	315	On the class of nonlinear evolution operators in Banach space
R. LAUTERBACH	339	Hopf bifurcation at a degenerate stationary pitchfork
M. G. CRANDALL and P.-L. LIONS	353	On existence and uniqueness of solutions of Hamilton–Jacobi equations
M. GIRARDI and M. MATZEU	371	Solutions of minimal period for a class of nonconvex Hamiltonian systems and applications to the fixed energy problem
N. GHOSH and R. ROSTAMIAN	383	An oscillating solution for the porous medium equation
C. R. HANDY	391	Polya–Padé Fourier resonance reconstruction and singular perturbation theory
K. DEIMLING and V. LAKSHMIKANTHAM	403	Periodic sample solutions of second order ODE's
Preliminary Communication		
A. C. LAZER and S. SOLIMINI	411	Nontrivial solutions of operator equations and Morse indices of critical points of min–max type
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 5

J. R. POUNDER and T. D. ROGERS	415	Dynamics of a two-parameter family of maps of the interval
M. G. CRANDALL and P. E. SOUGANIDIS	425	Convergence of difference approximations of quasilinear evolution equations
K. L. KUTTLER, JR	447	Time-dependent implicit evolution equations
HU SHOU CHUAN, K. DEIMLING and J. PRÜß	465	Fixed points of weakly inward multivalued maps
T. HARA, T. YONEYAMA, S. SAITOH and M. HIRANO	471	Relation between ultimate boundedness and radially unbounded Liapunov function
R. M. TORREJON	483	Perturbation of nonlinear operators and their parallel sum
T. I. SEIDMAN	491	Time-dependent solutions of a nonlinear system arising in semiconductor theory—II. Boundedness and periodicity
F. KAPPEL	503	Spline approximation for autonomous nonlinear functional differential equations
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 6

C. MAMMANA and F. ZIRILLI	515	On some nonlinear boundary value problem on the Poincaré disc with discontinuous data—I
G. BAKER, G. PACELLI and F. ZIRILLI	525	On some nonlinear boundary value problem on the Poincaré disc with discontinuous data—II
N. P. BHATIA and W. O. EGERLAND	541	On the existence of Li–Yorke points in the theory of chaos
A. BACCIOTTI and N. KALOUPTSIDIS	547	Topological dynamics of control systems: stability and attraction
A. FAVINI and P. PLAZZI	567	Existence of solutions for the abstract nonlinear equation $BTu = f(u)$
M. NAKAO	587	Periodic solution and decay for some nonlinear wave equations with sublinear dissipative terms
G. ANZELLOTTI, G. BUTTAZZO and G. DAL MASO	603	Dirichlet problem for demi-coercive functionals
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 7

N. S. PAPAGEORGIOU	615	Nonsmooth analysis on partially ordered vector spaces: the subdifferential theory
BAU-SEN DU	639	An example of a bifurcation from fixed points to period 3 points
P. DRÁBEK and S. INVERNIZZI	643	On the periodic BVP for the forced Duffing equation with jumping nonlinearity
S. A. TERSIAN	651	A mini max theorem and applications to nonresonance problems for semilinear equations
A. B. NÉMETH	669	A nonconvex vector minimization problem
S. UMAMAHESWARAM and M. V. S. SUHASINI	679	A global existence theorem for the boundary value problems of $y'' = f(x, y, y')$
V. T. HAIMO	683	An algebraic approach to nonlinear stability
J. K. HALE and XIAO-BIAO LIN	693	Examples of transverse homoclinic orbits in delay equations
Preliminary Communication		
A. CASTRO and R. SHIVAJI	711	Multiple solutions for a Dirichlet problem with jumping nonlinearities, II
SOFTWARE SURVEY SECTION	I	Integration technique for path integrals and stiff systems
	I	Full body plot
	II	Pipeline network optimisation (design)
	II	Taylor integration
	II	Ridgepath
	III	Sparse matrix operation

Volume 10 Number 8

S. ELAYDI and S. K. KAUL	713	Semiflows with global extensions
J. R. HADDOCK and T. KRISZTIN	727	On the rate of decay of solutions of functional differential equations with infinite delay
P. KHAJEH-KHALILI	743	Existence and uniqueness of solutions to nonlinear dissipative wave equations
F. V. ATKINSON and L. A. PELETIER	755	Emden–Fowler equations involving critical exponents
J.-M. GHIDAGLIA	777	Some backward uniqueness results

P. DONATO and D. GIACHETTI 791 Quasilinear elliptic equations with quadratic growth in unbounded domains

P. J. MCKENNA and W. WALTER 805 On the multiplicity of the solution set of some nonlinear boundary value problems—II

SOFTWARE SURVEY SECTION I

Volume 10 Number 9

J.-P. PENOT 813 The drop theorem, the petal theorem and Ekeland's variational principle

T. SHIGETA 823 A characterization of m-accretivity and an application to nonlinear Schrödinger type equations

P. BILER 839 Remark on the decay for damped string and beam equations

D. G. COSTA and M. WILLEM 843 Multiple critical points of invariant functionals and applications

T. KUSANO and C. A. SWANSON 853 Unbounded positive entire solutions of semilinear elliptic equations

P. KORMAN 863 Existence and approximation of solutions of inverse-positive problems

M. KHAVANIN and V. LAKSHMIKANTHAM 873 The method of mixed monotony and first order differential systems

E. DIBENEDETTO, C. M. ELLIOTT and A. FRIEDMAN 879 The free boundary of a flow in a porous body heated from its boundary

G. H. PIMBLEY 901 A semigroup associated with a quasilinear system in which the coupling terms are linear—I

G. STÉPÁN 913 Great delay in a predator–prey model

W. L. CHAN, L. F. HO and W. T. LAU 931 Interval bounds and equivalent problems in saddle point problems

M. E. SCHONBEK 943 Uniform decay rates for parabolic conservation laws

A. BOUCHERIF 957 Nonlinear multipoint boundary value problems

M. OBERGUGGENBERGER 965 Propagation and reflection of regularity for semilinear hyperbolic (2×2) systems in one space dimension

Erratum 983

SOFTWARE SURVEY SECTION I

Volume 10 Number 10

CH. FABRY and P. HABETS	985	Upper and lower solutions for second-order boundary value problems with nonlinear boundary conditions
J. BLOT	1009	The rank theorem in infinite dimension
A. J. VAN DER SCHAFT	1021	Stabilization of Hamiltonian systems
H. L. SMITH	1037	Cooperative systems of differential equations with concave nonlinearities
P. MARCATI	1053	Almost periodic solutions for a semilinear quasi-autonomous hyperbolic problem
G. R. BURTON	1069	Multiple steady states for rotating rods
W. E. FITZGIBBON	1077	Global existence for a particular convection diffusion system
L. BOCCARDO, P. DRÀBEK, D. GIACHETTI and M. KUČERA	1083	Generalization of Fredholm alternative for nonlinear differential operators
B. KAŚKOSZ	1105	Optimal trajectories of generalized control systems with state constraints
G. VIDOSSICH	1123	One-sided existence and uniqueness for periodic solutions of second-order ordinary differential equations
S. SIMONS	1133	An existence theorem for quasiconcave functions with applications
	1153	Corrigendum
SOFTWARE SURVEY SECTION	I	

Volume 10 Number 11

F. H. CLARKE and G. G. WATKINS	1155	Necessary conditions, controllability and the value function for differential-difference inclusions
N. KENMOCHI and I. PAWLOW	1181	A class of nonlinear elliptic–parabolic equations with time-dependent constraints
SHOUCHUAN HU and V. LAKSHMIKANTHAM	1203	Periodic boundary value problems for integro-differential equations of Volterra type
F. A. HOWES	1209	Stability of steady solutions of reaction–diffusion equations
A. BARUGOLA, J. C. CATHALA and C. MIRA	1223	Annular chaotic areas
A. J. MILANI	1237	Long time existence and singular perturbation results for quasi-linear hyperbolic equations with small parameter and dissipation term
J. LÓPEZ-GÓMEZ	1249	Multiparameter local bifurcation
K. DEIMLING	1261	Fixed points of weakly inward multis
S. CAPRINO and C. MARCHIORO	1263	On nonlinear stability of stationary planar Euler flows in an unbounded strip

C. M. BLAZQUEZ 1277 Transverse homoclinic orbits in periodically perturbed parabolic equations

GUO DAJUN 1293 Some fixed point theorems and applications

J. R. ESTEBAN and J. L. VAZQUEZ 1303 On the equation of turbulent filtration in one-dimensional porous media
